 - b) Spring fundraising event- Discussion re follow- up from the Dr. Finlayson event: it was well received by those in attendance. Participants found the session very informative & found Dr. Finlayson to be a relaxed speaker. His approach was well received as it was non –critical and non -judgemental, and he was a well informed speaker. Comments suggest that the handouts were user friendly and useful. Questions asked during presentation indicate that medical support is just not available in the community. Discussion followed as to the potential need for a follow up session/ forum/ panel in the spring as there is no longer an ADHS group in the community. Further discussion needed as to how best to approach this. Some questions raised included how best to assess if there is a need for more support for parents? Susan McCreary may be a contact for autism if we go with that topic for a future event. What are the supports are available for parents with children with special needs? Ask Stacey what her findings have been with respect to gaps or needs of parents.

ProGrant funding: Would we want to pursue a grant application to be able to offer a larger event? This may depend on the findings from Stacy’s survey results. PRO grants are available in the spring and requires partnering with schools.
